## Rodicut long lifespan grey anvils

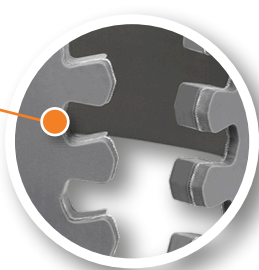

- **LONGLIFE Anvil Covers** are the result of an in-depth formulation study focused on extending the life of polyurethane covers. The secret of the formula is in an exclusive "longlife" component that provides resistance to cutting and abrasion, and resulting in a much longer duration than any standard product.

Special Formulation  
for long lifespan

- These covers are produced in a grey color that identifies the strength of the product, keeping the net flexible net support and improving the assembly with our new puzzle geometry, more efficient for die-cutting.

Efficient joint  
geometry

### New puzzle geometry, more efficient for diecutting

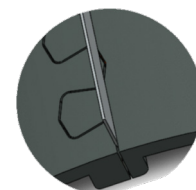

Comparative of possibility of coincidence of knives using:

Straight joint  
(0% support)

Traditional Jig-saw joint  
(<50% support)

Rodicut Full-cut joint  
(>75% support)

- **Longlife Anvil Covers** are available for any size and reference. Suitable for standard cylinders and also for freewheeling sleeves. Contact us for more information.
